

SPACE CRUISER

TM

SPACE CRUISER™

It is 2100 A.D. and you—the captain of SPACE CRUISER—are commissioned to patrol outer space in order to maintain peaceful existence on earth. There is plenty of action in TAITO's new full color, 1- or 2-player video space game, designed to test the player's ability in firing and skillful maneuvering.

As you begin your patrol, you encounter regiments of UFO's whose purpose is to destroy your spacecraft and proceed to attack earth. Defeat them and dock with your space station for extra fire power and a bonus spaceship—but first be prepared to test your flying abilities in the dangerous asteroid belt.

You seem invincible after docking, but the action never stops until you finally demolish the entire enemy planet.

Game Features: SPACE CRUISER is constructed in 8 separate phases. Prolog, Warp, UFO groups, Asteroids, Docking, Aliens, Planet Attacks, and the Ultimate Annihilation of the enemy planet.

Docking Feature: Docking requires a sharp eye and quick reflexes as both the player's spacecraft and the space station move in different directions at different speeds.

Continuation Feature: The player may add more coin(s) and press the exclusive continuation button to continue play to the exciting ending.

Challenges: Each frame offers more excitement as the UFO and alien attacks are different and more challenging. Some UFO's fire laser beams to momentarily immobilize the player! Some aliens attack in groups of 3; destroy the leader, and you destroy them all.

SPACE CRUISER is definitely a leader in the new era of video games.

Another exciting and original game from
TAITO — "The 'SPACE INVADERS' people".
